SUPPLEMENT

25X1A

ORIGIN

25X1A

25X1X

1. A recent survey of military installations indicates that the Boka Kotorska area is not being further developed as an important military base with V-weapon installations. The most important sector in this area is Tivat which will be equipped as a naval arsenal and repair base. Plans for the further development of Boka Kotorska were dropped because, since there is no natural water supply, all water must be collected from precipitation or shipped from inland and stored in cisterns. a torpedo factory is still to be built in the area.

25X1X

2. The following list contains military installations reported in the Boka Kotorska region. Many of the guns were dismantled from ships and installed in land batteries, and some 70% are considered obsolete. Those batteries described as dangerous are equipped with the most modern type of guns. (For place names see the G.S.G.S. 1: 100,000 for Yugoslavia, Sheet 136.)

Kamen
Radovici

Central Command Post. Radio antenna.
Artillery positions: 305mm, M.15, two batteries; 100mm, M.28, one battery; 150mm, M.28, one battery, described as dangerous.

Southeast of Tuscici at elevation 177

Old fortifications with fixed artillery: 210mm, M.80, four batteries; 90mm, M.4, four batteries.

Ercegovi

Old fortifications with fixed artillery: 210mm, M.73, two batteries.

Maljine

Artillery positions: 100mm, M.28, one battery; 80mm, M.6/28, one battery.

South of Kraj at elevation 241

Newly laid concrete foundations for movable artillery; 80mm, M.28, AA battery.

Glavica

Newly laid concrete foundations for movable artillery: 190mm, D.35, one battery, described as dangerous.

On coast north of Glavica

CONFIDENTIAL

Newly laid concrete foundations for movable artillery: 80mm, M.5/8, one battery.
